Professional summary: Unity game developer with experience as a Programmer and Technical Artist. Specialized in C# programming, shader creation, performance optimization for mobile and VR, and end-to-end project development, from code to art.

WORK EXPERIENCE

Freelance. 07/2022 – Present

Unity Developer – key clients.

- Built apps, AR and digital projects in Unity for Virgin, Bancolombia, Movistar, CeraVe, Uniminuto and SENA.
- Feature development and optimization, integrated local databases, AI integration and shaders.

Origen Interactive. 05/2026 – Present

Programmer & Technical Artist.

- Optimized the performance of interactive experiences and games.
- Created shaders with Shader Graph to visually enhance the projects.
- Improved the game feel of several projects.

Turpial Vibes. 04/2025 – 07/2025

Technical Artist.

- Acted as a bridge between developers and artists during project integration.
- Optimized performance to ensure smooth operation on mobile devices.

Delirium Studios. 12/2022 – 04/2024

Programmer & Technical Artist.

- Worked as a junior programmer on various game development projects, adapting to each client's requirements and needs.
- Designed and implemented shaders and visual effects, optimizing their performance in Unity.

PROJECTS

Xantaf3 – YouTube – *Technical Artist* 10/2026

- Cut draw calls from over 3,000 to 557 (−81%) by combining materials and textures, baking lighting and tuning occlusion culling.

Carnet Go – Google Play – *Technical Artist / Unity Developer* 04/2025 – 07/2025

- Designed levels and optimized shaders, improving mobile performance by 20%.

Mazeman – Itch.io – *Unity Developer / Technical Artist* 09/2024 – 10/2024

- Responsible for the full development of the game (programming and art).

EDUCATION

SENA – Technologist in Game and Interactive Environment Development 12/2024 – Present

- Training in programming, 3D modeling, animation, VR and Android development.

Additional courses (Udemy)

- *Visual Effects for Games in Unity* (02/2024 – 03/2024): VFX, particles and code-driven effects in Unity.
- *The Ultimate 2D and 3D Shader Graph* (03/2024 – 04/2024): Shader creation and integration in Unity.

TECHNICAL SKILLS

- **Languages & engines:** C#, Unity, Unreal Engine, Roblox Studio, Godot.
- **Art & techniques:** Shaders (Shader Graph), VFX, mobile & VR optimization, level design.
- **Modeling & texturing:** Blender, Adobe Substance Painter, Adobe Substance Designer.
- **Media editing:** Adobe Photoshop, Illustrator, Premiere.
- **Languages:** Spanish (native), English (B1).
